To: M Dechter <mikedechter@hotmail.com>;

Hi Mike,

Just a note to say that the Schizophyllum specimens arrived and look good. I'll be collecting spores from them next week.

This is the first specimen I have from Arizona. We finished the last of our scheduled collection trips by the end of May having successfully obtained samples from 45 states. Two by mail (yours and two from Hawaii) but the rest from 30,000+ miles of driving! We tried and failed from CO, UT, NV, ID, MT and WY. Just too dry.

Thanks so much for your help!

Rick
